NOTES

*If you would like to donate a box of tissues and hand sanitizer,
please send some in to your child’s Homeroom Teacher.
We welcome these donations year round. Thank You!*

One (1) Student Planner will be given to students for 2017-2018. Planners are required on a daily basis for all students (If original planner is lost, a replacement may be purchased at the school for a cost of \$3)

The TI-84 Plus Silver Edition Graphing Calculator will be used regularly in your child’s class. Graphing calculators are an important technology used in Howard County mathematics courses beginning with pre-algebra and extending through the end of the mathematics course sequence. **Although students will be provided with a graphing calculator for use in school and have the ability to borrow one for out of school use, students are best served by having a personal calculator and becoming very familiar with how it is used to address a number of different types of mathematics problems.** Students who go on to take mathematics courses in college will often be able to use the same calculator for college course work.

Backpack Safety: Pack it light, wear it right!

A reference card for administrators, teachers, parents and students to promote and support backpack safety in the Howard County Public School System

Introduction

Backpacks are a practical way for students to carry schoolbooks and supplies. They are designed to distribute the weight of its contents among some of the body's strongest muscles; therefore, when used correctly, backpacks can be a beneficial way to carry the materials needed for school.

In recent years, the weight of student backpacks has become a public health concern. Recommendations coming out of recent studies on backpack safety encourage school systems to do what they can to lighten the load for students and that students, parents, and staff become educated in backpack safety.

The Howard County Public School System (HCPSS) recognizes its responsibility to provide a safe and healthy learning environment for all students and acknowledges the necessity to ensure that the school environment promotes and protects students' health and well-being. Schools, parents, and students each bear responsibility for backpack safety. Collaboration between the school and the home is needed to help students develop the necessary skills, knowledge, and attitudes regarding backpack safety.

Suggested Strategies for Administrators

- Utilize a variety of venues to share information periodically on backpack safety with parents, students, and staff such as PTA newsletters, e-schoolnewsletter, and school webpage.
- Print backpack safety tips on the back of the school supply lists that are distributed to families.
- Provide parents and families with information at Back to School Night.
- Promote National School Backpack Awareness Day in September.
- Ask students for their suggestions for lightening their backpack loads.
- Educate students on backpack safety through morning, homeroom, or advisory announcements.
- Ask staff members to support students who need additional assistance with organizing backpacks.
- Encourage locker use.
- Implement periodic school-wide "Cleanout and Recycle Days" for student backpacks and lockers.
- Provide sufficient time at end of the day for students to pack only what they need to take home.

Suggested Strategies for Teachers

- Collaborate with team members on the school supplies list to encourage efficient use of materials and reduce overall weight of a student's backpack.
- When developing school supply lists consider the weight of textbooks, notebooks, and supplies that students are required to carry for other classes.
- Communicate with parents and students about what needs to be brought home each day and what supplies and materials may be kept at school.
- Teach backpack safety skills to include demonstration of proper use of back "packing" as part of the essential health education curriculum at all school levels.
- Teach students organization skills emphasizing how and what to pack in a backpack.
- Review and purchase materials of instruction to support instruction on backpack safety in appropriate classes.
- Identify class projects and student research investigations to educate peers about backpack safety as appropriate.
- When available, provide an extra set of textbooks in core classes to be kept at home.
